SensoGate® WA 130 H

Pneumatic sensor lock-gate for demanding fully automated process applications in hygienic areas

Easy installation and clear hose connections

SensoGate® WA 130 H offers genuine Plug & Play: The central multiplug is simultaneously linked via a single connection to all rinsing, cleaning, and calibration media as well as the control air and limit-position mechanisms. With the complete interior media routing and the multiplug, the connection is just as safe as it is convenient. Media entrainment is minimized and the limit-position mechanism is reliably protected.

SensoGate® with central multiplug

Conventional retractable fittings: Tangled hoses (left) and deposits on unprotected limit-position mechanism (right)

Systematic, Fully Automatic Liquid Analysis

The combination of the SensoGate® WA 130 H retractable fitting with the Uniclean® 900 (cleaning) or Uniclean® 9000 (cleaning and calibration) control units and the Protos® 3400 measuring system enables fully automated measuring stations with an outstandingly high level of precision and reliability. The system offers the highest levels of safety with monitoring of the compressed air and water supply, the probe position, and the buffer and cleaning solution levels.

Maximum stability and precision due to patented metering-pump technology with separate routing of the media. Short-time measurements and regular cleaning enable longer sensor life. The production process is neither interrupted by automatic cleaning nor by calibrations.

Additional Media Connection for Superheated Steam or Chemical Applications

- additional media connection decoupled by integrated check valve
- easy access
- no dead spots
- valve with high flow rate

Uncompromising Hygienic Design of the Calibration Chamber

The process-wetted parts as well as the calibration chamber of the SensoGate® WA 130H Sensor Lock-Gate have validated sterilization capability. This means that it is suitable for unrestricted use in pharmaceutical and food applications and also allows validation in FDA-regulated production processes. A special design enables the directed flow to the process seal.

Sterilizable and cleanable calibration chamber with special flow body

Facts

- steam-sterilizability validated for all process-wetted parts incl. rinsing/calibration chamber
- compact, smooth, and dirt-resistant design with interior media routing and integrated limit-position mechanism
- directed flow rinses the process seal from the process side as well as from the inside of the fitting
- perfect sensor cleaning effect by cyclone rinsing
- safe separation to the process during probe movement and prevention of re-contamination
- double gaskets with leakage bores prevent microbial contamination of the drive
- broad applications in hygienic conditions
- cost reduction by simple installation, operation, and maintenance
- very high availability
- protective rinsing of the seals for a long service life
- SensoLock for high safety of operation
- integrated check valves and limit switches
- fast and uncomplicated replacement of calibration chamber and immersion tube
- all maintenance can be performed on site
- superior sensor immersion depth
- standard sensor length (225 mm) even for large immersion depths
- multiple process connections available
- process-wetted parts: stainless steel 1.4404, electropolished
- modular design
- special version for sensors with pressurizable liquid electrolyte
- SIP and CIP capable in the process
- SIP and CIP of calibration chamber and media routing

SensoGate® WA 130 H for hygienic applications

The Versions Available

- material: 1.4404, electropolished
- variants: short and "long" immersion depths; liquid- or gel-filled sensors; adapter for free hose connection
- ball bearings for easy detachability
- process adaptations:
 - dairy pipe DN 50 ... 100
 - Ingold socket 25 mm
 - clamp 1.5" ... 3.5"
 - Varivent DN 50 ... 80
 - BioControl DN 50, DN 65

Specifications

Ambient temperature	5 ... 70 °C
Permissible process temp	5 ... 140 °C
Permitted process pressure during movement	6 bars gauge pressure at 140 °C
Permissible static pressure	16 bars (40 °C) in service position
Air supply	4 ... 7 bars, filtered 10 ... 25 µm, oil- and condensate-free
Effective immersion depth	33 mm, measured from lower edge of flange to sensor tip (Varivent version)
Total immersion depth incl. immersion tube	46 mm
Process adaptations*)	dairy-pipe screw joint, DN 50/DN 65/DN 80 Ingold socket, 1.4404, 25 mm (G 1 1/4") Clamp 2", 1.4404 Varivent, DN 50 – 125, 1.4404
Sensors	225 mm, Pg-13.5 coupling, 250 mm for pressurized liquid-electrolyte sensors
Rinse-medium inlet	1) for Unical® 9000/Uniclean® 900: Connection with hose grommet and coupling 2) for manual control: ZU 0631/ZU 0646
Rinse-medium outlet	connection: hose grommet with coupling
Rinse function	seal rinsing during stroke movement
Process-wetted materials	stainless steel, 1.4404
Enclosure	stainless steel, 1.4571
Ingress protection	IP 66
Connection to Uniclean® 900/Unical® 9000	compact multiplug connection
Sensor protection in the process	integrated in immersion tube
Limit switches	noncontacting electrical limit-position control in conjunction with Uniclean® 900/Unical® 9000/ZU 0631
Certificates	3.1 Material Certificate (optional) ATEX II 1 GD c II

*) Special connections on request
